## Old Timers' Association Raises Membership Fees

A meeting of the executive committee of the Carbon Old Timers' Association was held October 31 in W. A. Braisher's store. After a statement of finances was read by the secretary treasurer it was decided "that in view of the dwindling balance of funds of the Carbon Old Timers' Association it would be necessary to increase the yearly dues for 1952 to \$1.00 per member, and that each of the executive committee would have a certain number of members to interview regarding this."

The annual general meeting will be held in W.A. Braisher's store Wednesday evening, December 5, when the election of officers will take place and activities outlined for the ensuing year.

It was also confirmed that flowers would only be sent to sick members in good standing.

A Local of the Farm Women's Union has been formed in Carbon with the following officers heading the group:

Mrs. R. Garrett, president.  
Mrs. E. Grenier, vice-pres.  
Mrs. S. Garrett, sec.-treas.  
Directors, Mrs. L. Coates and Mrs. H. Bramley.

The meeting was held at the home of Mrs. S. Garrett and it is planned to coincide future meeting with those of the Carbon F.U.A. Local and the Junior Grain Club.

It is hoped that a large number of district farm women will join the Local. Whether they wish to join or not, they are urged to come to the next meeting so that they may satisfy themselves as to whether the movement is worthwhile. Next meeting date will be announced later.

## "Club 21" Formed

"Club 21" was the name chosen for a new club organized Friday evening at a meeting in the Anglican Church basement. Officers elected were:

President, Jack Barr.  
Vice-pres., Mrs. Jack Barnes.  
Secretary, Mrs. Morris Switzer.

Treasurer, Mrs. Earl Ohlhauer.

Object of the club is to encourage more local interest in the arts and sciences, national and international affairs, and bring together single men and women and married couples for evenings of entertainment. Programs will include the showing of films and social get-togethers.

Meetings will be held twice a month, with the next scheduled to take place in the Anglican Church basement on Tuesday, November 13, at 8:30 p.m.

The Home & School Association supper will be on Saturday, November 17, as planned. Special attention will be given to business men and clerks who desire to get back to business places within the hour.

## Longer To Live

ONE OF THE ADVANTAGES of living in the present century would appear to be a growing tendency for men and women to enjoy a longer life span. Life insurance officials report from time to time on this subject and figures given by them show that the life expectancy of the average person has increased considerably since the beginning of this century. One firm reported that since 1912 the average length of life of industrial policy holders had increased by twenty-one years. The rate for industrial policy holders is reported to be slightly higher than for the general population, but no doubt figures for this group would represent the general trend.

### People Now Live Longer

The decline in the death rate has been steady through the past thirty years and at the present time the average length of life of industrial policy holders is 68.3 years. This marks an increase of three years since 1946. Advances in medical science, higher standards of living, extended public health services and increased use of hospitals through sickness insurance plans were given as reasons for the declining death rate. In addition, many diseases which formerly took a large toll of lives each year have been brought under control, and the number of fatalities from pneumonia, influenza, tuberculosis, and common childhood diseases have decreased steadily in recent years.

### Work Still To Be Done

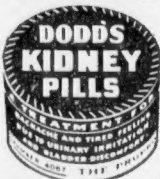

It is encouraging to know that the scientific and social advances which have been made in the present century are resulting in a longer life expectancy for the people. Much time, effort, and money has been put into the fight against disease and great strides have been made, too, in extending health services, and in raising living standards throughout the country. The decline in the death rate is a tribute to these endeavours and no doubt it will continue to drop as time goes on. The results which have been achieved so far should be encouraging to those who work in various ways to prolong the life expectancy of the population.

#### AVOID EMOTIONAL UPSETS

Try to avoid emotional upsets at mealtime—such upsets tend to upset digestion.

## When Your BACK Begins to Ache

## Fashions

### Two-Piecer

4507 12-20

by Anne Adams

Wraps! Buttons! Cut from ONE main pattern part—that's the blouse! Hangs beautifully! Slender but walk-easy! Sew-simple too—that's the skirt! A honey of a two-piecer for any occasion and that's what you need! Smart and gay in rayon or wool!

Pattern 4507 comes in sizes 12, 14, 16, 18, 20. Size 16 takes 4½ yards 39-inch fabric.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,  
Winnipeg Newspaper Union,  
60 Front Street W., Toronto.

## Funny and Otherwise

Donald and Mary decided to adopt a child. A little girl was produced and Mary was about to close the bargain when Donald tapped her shoulder.

"Mary," he whispered, "let's have a boy. Hae ye forgotten the lad's cap we found in the train?"

1st wife: "Does your husband still find you entertaining?"

2nd wife: "Not if I can help it!"

**Farm For Sale.** If purchased before next heavy windstorm, a barn will be included.

A small boy saying his prayers finished by asking for a baby sister. Then he turned to his mother and said, "And please may I have the wheels off her pram when she's done with it?"

The boss carpenter was instructing the new apprentice. "Now, we don't worry about you hitting your thumb with a hammer. It's the time you lose getting it attended to to which we object."

Man in department store, to clerk: "Have you any dog houses?"

Clerk: "Do you want it for yourself?"

Man: "Certainly I want it for myself. Who did you think I wanted it for?"

Clerk: "I thought you might have a dog."

Husband: "You women make me laugh. You say you've been shopping, but you haven't bought a single thing."

Wife: "It was only yesterday, dear, that you said you had been fishing."

"This crime," said the judge, summing up, "was carried out in an adroit and skilful manner."

Blushing, the prisoner interrupted: "Now, my lord, no flattery, please."

**Now Many Wear FALSE TEETH With Little Worry**

Eat, talk, laugh or sneeze without fear of insecure false teeth dropping, slipping or wobbling. FASTEETH holds plates firmer and more comfortably. This pleasant powder has no gummy, gooey, pasty taste or feeling. Doesn't cause nausea. It's alkaline (non-acid). Checks "plate odor" (denture breath). Get FASTEETH at any drug store.

#### PEGGY

## Science Improves On Mother Nature

This "angry sea" is mechanically created in Scotland's largest open-air swimming pool at Portobello, and the storm-tossed rubber rafts on the pool contain British soldiers who are serving as guinea pigs for science. One hundred and fifty tommyes volunteered to get seasick in order to help the Royal Navy's quest for an effective remedy for seasickness.—Central Press Canadian.

## Cookies For Christmas Parcels

When it comes to packing those Christmas parcels for the boys overseas, you'll want to include those all-time favorites—homemade cookies. And the more substantial the cookie, the more chance of its reaching its destination intact.

Here are just a few popular recipes:

**Peanut Cookies:** ½ cup shortening, ½ cup brown sugar, ½ cup white sugar, ½ cup quick rolled oats, 1 cup cornflakes, 1 cup flour, 1 tsp. baking powder, ½ tsp. baking soda, 1 egg, vanilla, ½ lb. pkg. salted peanuts.

Mix all ingredients as usual and lastly empty in the salted peanuts. Drop from spoon on greased baking sheet.

**Quick Rolled Oats Cookies:** ¼ lb. shortening (a little butter is good flavor), ½ cup brown sugar. Cream together. Add: ½ tsp. baking soda dissolved in 1 tablespoon boiling water, ½ tsp. vanilla. Add: 1 cup quick oats, 1 cup sifted flour, pinch salt.

Oven temperature 350 degrees. Electric stove bake 12 to 15 minutes. Gas stove bake 8 to 10 minutes. You may add coconut to above mixture.

**Cherry-Almond Delights:** ½ lb. glace cherries, ½ lb. almonds, 1 cup coconut. Put all through mincer. Bind with a slightly beaten egg. Pinch off pieces and roll in small balls. Drop in a castor sugar bag, a few at a time, shake until sugar-coated. Put in pan and set in refrigerator until needed. These are not cooked.

**Oatmeal-Coconut Cookies:** ½ cup shortening, ½ cup granulated sugar, ½ cup brown sugar. Add 1 egg unbeaten. Add: ½ cup flour sifted with: ½ tsp. baking powder, ½ tsp. baking soda, ½ tsp. salt. Add: 1 cup shredded coconut, 1 cup quick oats, few drops vanilla. Drop from spoon on greased cookie sheet.

**Canadian Macaroons:** 2 egg whites, ½ cup granulated sugar, ½ cup brown sugar, 1 tablespoon flour, 2 cups cornflakes, ½ cup walnut meats, chopped, 1 cup shredded coconut, 1 teaspoon vanilla. Beat egg whites until very stiff, add sugar, flour and other ingredients. Mix well and drop by teaspoonfuls on buttered cookie sheets. Bake 20 minutes in a moderate oven (350 deg. F.). Yield: 60 macaroons.

## Mallard Duck Hits Record Weight Of Six Pounds Two Ounces

PRINCE ALBERT, Sask. — A six pound two ounce female Mallard duck shot near the Carrot River valley is believed a record Saskatchewan hunting catch, resources department officials said.

The wingspread of the Mallard was 43 inches and its length 28½ inches.

The Mallard was shot by Steve Sedlock of The Pas, Man. Carrot River valley is 125 miles northeast of here.

## Flin Flon Puts Into Operation Unique Sewer, Water System

FLIN FLON, Man. — Mayor Cyril Stevenson pressed a switch and the \$1,600,000 sewer and water system here was put into operation on Oct. 24.

The special ceremony at the pump-house took place at 3 p.m. and opened this northern Manitoba mining town's greatest public works project in history.

The installation—of the return system type—was necessary to prevent freezing when virtually all pipes had to be laid above ground due to the rocky terrain.

## PLAYING COACH FOR NEEPAWA

NEEPAWA, Man. — Neepawa Greenshirts of the Manitoba Big Six intermediate hockey league have announced the signing of Lin Bend of Poplar Point, as playing coach for the coming season.

## Man. Experiences Worst Harvesting Year Since 1900

WINNIPEG. — Manitoba agricultural experts said the current harvesting season rivals 1900 as the most unfavorable in the history of the province.

Between 15 and 20 per cent. of the Manitoba crop was still to be harvested on Oct. 26, the provincial agriculture department reported.

Most of the unharvested crop lie in the southwest, west and northern sections of the province.

Main cause of the poor harvest is said continuous unfavorable weather conditions including several snow-falls.

Officials estimated that not more than 20 per cent. of the crop in the rich Swan River valley country has been harvested to date.

In 1900 records show that farmers finally got their break in good weather on Oct. 7. This year, poor weather has generally prevailed throughout the last two months.

At least 90 per cent of the province's sugar beet crop has been harvested so far.

#### GIANT PUMPKIN

MOOSE JAW, Sask. — M. C. Biden of Moose Jaw has a giant pumpkin and was ready for Halloween. He grew a monster weighing 42 pounds and 54 inches in circumference.

## Dream A Reality

BALDUR, Man. — It was 20 years ago when P. G. Woelke of Morden, Man., first thought of mining the Pembina mountain overlooking the fertile wheat fields of the Red River valley.

Today that dream is a reality. Woelke and his son, John, opened a Bentonite mine right on the crest of the mountain. The 16,000 tons of rich bentonite clay they extract from the earth has annual value of \$50,000.

## Finer, tastier BREAD

Yours, with wonderful fast-rising DRY Yeast!

You're sure of tempting delicious bread when you bake with Fleischmann's Fast Rising Dry Yeast! This wonderful new yeast keeps its full-strength and fast-acting qualities without refrigeration! Buy a month's supply!

#### WHOLE WHEAT BREAD

• Combine 3 c. boiling water, ¼ c. granulated sugar, 4 tps. salt and 1 tbs. shortening; stir until sugar and salt are dissolved and shortening melted; cool to lukewarm. Meanwhile, measure into a large bowl 1 c. lukewarm water, 1 tbs. granulated sugar; stir until sugar is dissolved. Sprinkle with 3 envelopes Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Stir in cooled sugar-shortening mixture. Combine 5 c. once-sifted bread flour and 5 c. whole wheat or graham flour. Stir about half of the flour into yeast mixture; beat until smooth. Work in remaining flour and add additional bread flour, if necessary, to

make a soft dough. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Punch down dough, grease top and again let rise until doubled in bulk. Punch down dough; turn out on lightly-floured board and divide into 4 equal portions; form into smooth balls. Cover lightly with cloth and let rest for 15 mins. Shape into loaves; place in greased loaf pans (4½" x 8½"). Grease tops, cover and let rise until doubled in bulk. Bake in hot oven, 400°, for 20 mins., then reduce oven heat to moderate, 350°, and bake about 20 minutes longer.

—By Chuck Thurston

# Epidemics Are Always a Threat Checked Only By Health Services

By DAVID A. HELLER  
(CPC Correspondent)

WASHINGTON. — Suppose that someone down the block from you caught smallpox. What would you do?

That's easy. You'd go to the doctor and be vaccinated against smallpox. And you'd feel safe—with good reason.

Only a few years ago, in 1947, a man found to have smallpox mingled with New York City's teeming millions. Within a few days more than 6,000,000 people were vaccinated. Only 12 caught the highly contagious disease.

We take it for granted that when our doctors buy vaccines and serums for us, they will be safe and potent—that they will protect us from disease.

In many nations of the world people do not have this easy assurance and we did not always have it in Canada or the United States. Biologic products, as vaccines and serums are called, are made with death-dealing living organisms. Unless these organisms are properly "inactivated", and unless certain other substances are kept out, they are dangerous. Biologics can kill as well as cure, and they require careful laboratory procedures.

The easy assurance with which we trust our lives to biological products from the corner drug store is due in large measure to 50 years of patient, painstaking work of the public health services in Canada and the U.S. Their efforts may have saved your life.

The range of biologics is tremendous. It includes hundreds of preparations from the common smallpox vaccine to the rare cobra venom used as a pain killer. All have one thing in common. They are prepared from living organisms.

No firm may send biologics across state lines in the U.S. until its equipment, methods and products have been rigidly tested and licensed by the Biologics Control laboratory, which works closely with public health organizations in Canada and other countries.

Every man in all theatres of action during World War II received shots for tetanus, typhoid fever and smallpox. In addition, tremendous quantities of typhus, yellow fever, cholera, diphtheria and plague vaccines were required. Vaccines for rare tropical diseases, such as Japanese Encephalitis unknown in North America, had to be developed—and in a hurry. The lives of fighting men depended on it. The Biological Control lab supervised all this activity.

Today, in co-operation with the U.S. armed forces, the Biologics Control lab is interested in developing vaccines for diseases found in Korea.

The Biologics Control laboratory performed a major wartime job in setting up standards for human blood and plasma. Through licensing, it supervised the supply of blood and plasma from blood donations made to the Red Cross. More than 13,000,000 vials of blood were processed by plasma and serum albumin—by far the largest undertaking of this sort in history. This work continues.

Development of a rabies vaccine which is safe in all cases seems to be the latest feather in the cap of the Biologics Control laboratory.

Today when someone is bitten by a dog which has escaped and cannot be given a medical examination to learn if it has rabies, a difficult problem is posed for the doctor.

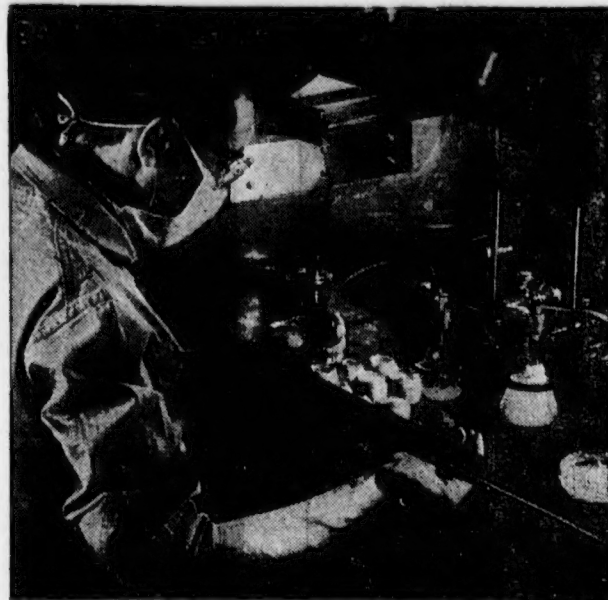

Does the dog have rabies?

## HERE'S HEALTH

**FIGSBY WON'T WEAR RUBBERS, EVEN WHEN THERE'S RAIN AND SLEET, SO HIS COUGHS AND COLDS AND SHUFFLES ARE THE SEQUEL TO WET FEET.**

Dept. of National Health and Welfare

—Central Press Canada  
Falcitacosis (parrot fever) virus is harvested from chick embryos previously infected with the virus at Bethesda, Md., laboratory

If so, the sooner vaccinations are given the victim, the better chance that he will not get the always-fatal disease.

However, rabies vaccine now has a danger of its own. It cannot be given with entire safety. About 1 out of every 5,000 persons given the vaccine develops a sometimes-fatal paralysis.

If the wound is slight, and exposure to rabies is uncertain, doctors and victims are given anxious moments. Should the vaccinations be given?

There is no compromise, of course, when the victim has suffered a severe exposure, is bitten by a dog known to have rabies. Here the vaccine is given immediately since there is no help for the patient after symptoms of rabies appear.

The question of compromise may not have to be considered much longer. The National Institutes of Health scientists have developed a method for removing the paralysis factor from rabies vaccine.

The new method has proven experimentally successful and the new vaccine should be commercially sold soon. When it is, doctors will be able to give patients rabies vaccine without fear.

## TRY AND STOP ME! By BENNETT CERF

Morey Amsterdam says that when a woman driver sticks out her arms, you can be sure of only one thing: her window is open.

The ladies may not be able to help the way they drive, but they'll certainly reduce their middle-aged spread if they heed the words of Gaylord Hauser, author of "Look Younger, Live Longer". "Look French pastry squarely in the eye," counsels Hauser. "Remind yourself, 'This will be a few seconds in my mouth, a few hours in my stomach—but a whole lifetime on my hips.'"

## He Knows How His Wife Drives

BISMARCK, N.D. — A Bismarck man has plans for a new home.

On one door of the double garage he will paint "hers"; on the other "his".

The door marked "hers" is two feet wider.

## On The Side : By E. V. Durling

Ever hear of a book titled "Self-Help" by Samuel Smiles? Written in 1859, it is rated one of the best books of its kind of all time. Has been translated into 25 languages. Lord Leverhulme, the British soap manufacturer, considered his reading of this book as a young man a major factor in his success. Incidentally, Leverhulme started at scratch and built up a business valued at \$150,000,000. Whenever a young man asked him for advice, he presented him with a copy of Smiles' "Self-Help".

### The Woman Knows

Can it be that only a woman really understands women? Is it hopeless for men to try to solve this problem? It was a man who produced a film titled "Secrets of Beauty". In this film are revealed many secrets of make-up, face rejuvenation, etc. Film men thought they had a terrific box office title that would draw crowds of women. The film flopped. The women ignored it. Then a feminine friend of the producer's suggested a change in title. She advised them to title the picture, "Why Men Leave Home". They did. It became a box-office hit.

### Things Are Different

Joe Louis' earnings as a boxer should have made him a millionaire. That he is not cannot be attributed to extravagance. Joe paid out 80 per cent. of his earnings in the form of income tax. Dempsey and Tunney were only called upon to pay about 10 per cent.

### Color Psychology

When a woman wears a red evening gown, it is a powerful medium of male attraction, or so say the experts on color psychology. It is also claimed that when a woman feels blue, if she dons a red hat it will cheer her up. Today I saw a female who must have got faith in the claims of the color psychologists. She was attired entirely in red. She wore a red hat and red shoes. She did attract a lot of attention. But it was the kind of attention people give to a circus parade. When I saw this young woman approaching, I thought she was advertising something.

### Starting Life Right

A young mother, one between the ages of seventeen and twenty-three, is less likely than a more mature mother to impart or transmit to her offspring any unfavorable characteristic or tendency she may have in her make-up. Such is the claim of an expert on infant care.

### The Ubiquitous Cassidy

Is Cassidy an Irish or a Scotch name? I always figured it to be distinctly an Irish name, but I have recently heard of several Scots named Cassidy. One, named Sam Cassidy, of Auchloch, Scotland, is achieving considerable notice as an amateur hypnotist. When a friend goes to the dentist, Cassidy goes along and hypnotizes him so the operation will be painless. He recently hypnotized a feminine friend who then had seven teeth pulled and not only suffered no pain during the operation, but very little from the after effects.

### For The Newlyweds

"A book every newly married couple should read. Two shillings." That advertisement appeared in a London newspaper. That was all there was to it. Title of book was not mentioned or was it further described. Many curious married couples answered. In return for the two shillings they received a Bible. Some complained and caused the seller to be brought into court. He was promptly acquitted. The judge agreed the Bible was a book every newly married couple should read. The seller of the Bibles had acquired them at an Army surplus sale. He realized quite a profit. . . . When on the French Riviera, just before World War II, I often rode from Cannes to Monte Carlo on a train described as the "Auto Dynamique". That was the speediest train I ever experienced. The "Auto Dynamique" rode on rails, but was equipped with an automobile engine. It often hit over 100 miles an hour. I have frequently wondered why that type of transportation has not been used on short runs in this country.

## HEALTH

### Fewer Sweets, Sound Nutrition Cut Tooth Decay

Experimental evidence cited by Dr. Gordon Nikiforuk in the current issue of Health indicates a strong relationship between sugar and tooth decay. He adds, however, that it does not necessarily follow that people who eat sugar will suffer from tooth decay, any more than all people who are exposed to the tubercle bacilli will inevitably contract tuberculosis. Sugar is one of the important factors, but it is not the only factor.

"Tooth decay is a complex process influenced by many factors, some of which are not fully understood," writes Dr. Nikiforuk, who is associate professor of pedodontics of the Faculty of Dentistry, University of Toronto. "A more complete explanation of all observed clinical facts will only be possible when, through research, we learn more about such factors as the influence of saliva, tooth structure and tooth substance, prenatal tooth development, and systemic conditions as they are related to dental health."

There is reason to hope, according to this article in the Health League of Canada's official magazine, that within the next few decades research will develop a method by which tooth decay may be prevented.

"In the meantime a reduction in sweets is sound advice," says Dr. Nikiforuk. "And when this is coupled with sound nutritional habits and good oral hygiene, Canadians will enjoy better dental health."

The following dietary guides are offered in the magazine as a means of reducing tooth decay:

1.—An appetite for sweet foods can be acquired by children at an early age. Therefore it is important to refrain from excessive sweets during childhood. There is no need for sweetening the baby's orange juice or pabulum with sugar.

2.—Reduce the number of eating periods during which candies, jams, cookies and cakes are consumed. If you must eat sweets, they should constitute part of the meal.

3.—Immediately after eating, remove food debris by thorough brushing and rinsing. Brushing teeth two hours after eating sweets is of little benefit. Eating a raw fruit after a meal will often clean your teeth as well as a good mouth rinse.

4.—A nutrition program that adheres to the Canada Food Rules, which does not recommend refined sweetened foods, is economically and nutritionally the most sound plan to follow. There is no need for a special nutrition program for dental health.

## Horse Sense

Darkie, a little black pony that pulls an ice-cream wagon, was always a favorite with the children at Gateshead, Durham, England. They fed him cakes and lumps of sugar and generally spoiled him. One day Noreen Robson, 7, ran from her home to buy ice-cream, fell and rolled almost directly under Darkie's legs. Darkie's driver shouted, a woman screamed and Noreen lay frozen in terror. The only cool party was the pony, who lowered his head and flicked Noreen out of his path as the wagon passed over the spot. "It was so close the wheel grazed my daughter's hip," said Noreen's father. She only suffered bruises.

## CANADIAN FASHIONS

Above, a white satin evening gown with moulded bodice and silver thread spray embroidery is highlighted with sequins and brilliants.

This hand from match play was a fine example of cue bidding in the face of a spirited barrage. South bid One Heart, West One Spade, North Three Clubs, and East Three Spades. South showed his power with Four Hearts. West bid Four Spades, and North countered with a cue bid of Five Spades.

South's reply was Six Clubs, and a further cue bid of Six Diamonds by North was an obvious grand slam try which South converted to Seven Hearts on the strength of his solid trumps. When East doggedly sacrificed in Seven Spades, South passed. North accepted this tacit invitation to bid Seven No-Trumps if he held ♠A, and scored 2220 points as against his team-mates' loss of 500 at the other table in Seven Spades doubled.

## MALE MAJORITY

VANCOUVER. — Co-eds at the University of British Columbia shouldn't have any dating difficulty this winter. Of the university's total enrolment of 5,555 students, the registrar's office reported 75.1 per cent. are male.

## TROUBLE IN SUEZ

—Die Weltwoche, Zurich, Switzerland.

# :: Pictures of Canadian Tour of Royal Couple ::

Princess Elizabeth and the Duke of Edinburgh are shown at an Indian village south of Calgary, receiving an Indian costume for Prince Charles. Costume for the young prince was made by Alberta Indians. In addition to seeing the village the royal couple were treated to a small scale stampede.

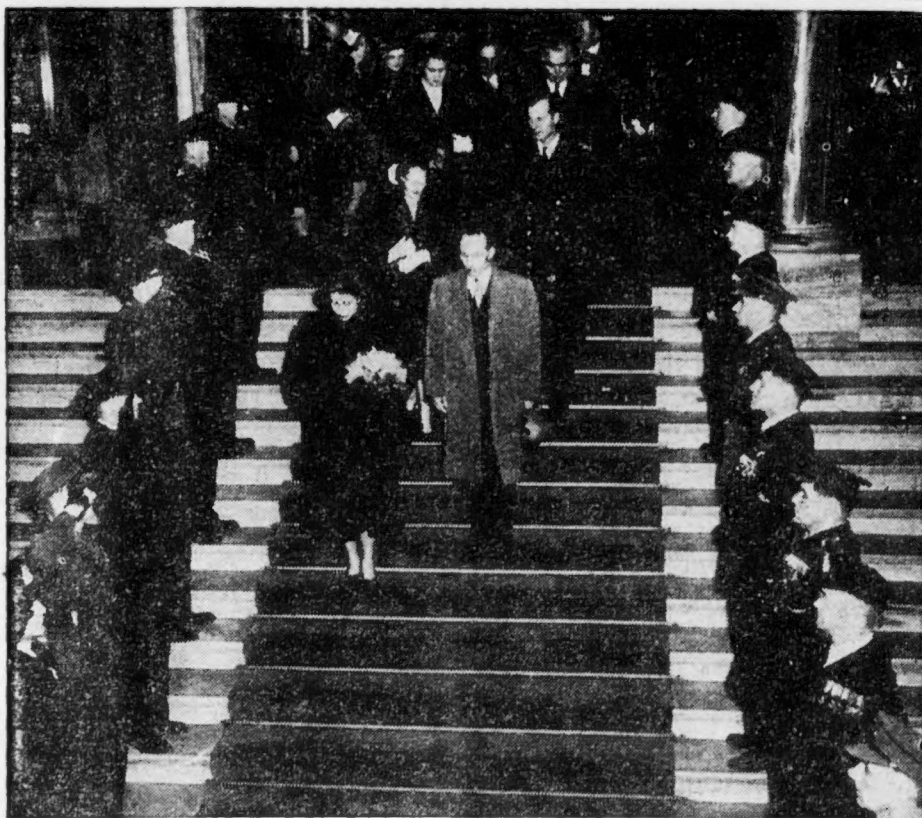

On the historic Plains of Abraham at Quebec City, Princess Elizabeth inspected members of the Canadian 25th Brigade. She steadied herself with one hand on the windshield while the jeep moved. With the Duke in the back seat is Brig. Geoffrey Walsh of Oakville, Ont.

While Princess Elizabeth admires a miniature totem pole presented to her in Vancouver, Prince Philip is busy making friends with a young subject. The Vancouver and Victoria visit found the royal couple tired but happy at the welcome they received.—Central Press Canadian.

Typical of the enthusiastic reception with which Canadians have received Princess Elizabeth and the Duke was the scene in Chatham, Ont., where 20,000 cheering citizens thronged the station for a glimpse of the famous couple. Photo shows royal pair being welcomed by town officials, with Hon. Paul Martin at extreme right.—Central Press Canadian.

The royal party descends the Saskatchewan legislative building steps at Regina, escorted by provincial officials.

On the bridge of H.M.C.S. Crusader, the Royal Couple scan Victoria's inner harbor with Rear Admiral Creery.

A spot of "Canadiana" was injected into royal couple's visit to Brantford, Ont., when Princess Elizabeth shook hands with an Indian chief in full regalia, from nearby Indian reserve. Town was one of many which had brief glimpses of Their Highnesses on their whirlwind tour of southern Ontario.—Central Press Canadian.

## Black Chaff

A minor bacterial disease of wheat known as "Black Chaff" is very evident in Alberta this year because of the prolonged moist, cool weather. This condition has been mistaken for black rust in some parts of this district. The brown or black spots, which appear on the stem and head chaff of wheat gives it a black appearance. It has been identified as "Black Chaff."

Samples of the affected wheat were taken from fields in the Huxley and Elnora area. They were sent to Dr. A.W. Henry, Professor of Plant Pathology, University of Alberta. He states that the samples were not affected appreciably with rust but rather with a bacterial disease known as Black Chaff. The Thatcher samples appear to be affected as well with the fungus disease known as Glume Blotch, a less serious disease than Black Chaff. Both Saunders and Thatcher wheat are known to be quite susceptible to Black Chaff whereas Redman is known to be moderately resistant. The wet season has been especially favorable for Black Chaff.

Dr. M.N. Grant, disease specialist at the Science Service Laboratory, Lethbridge, states that this season most of the dark spots and blotches of wheat stem and chaff are caused by harmless fungus growth of the Alternaria and Cladosporium species. They will not cause appreciable damage, although some "black point" may occur on the kernel.

Two other causes of wheat head blackening, Dr. Grant points out, have given rise to rust scares. One is a minor bacterial disease known as "Black Chaff". The other is an inherent tendency of some wheat varieties to deposit a dark pigment in the outer layer of the chaff cells. This harmless condition is known as "false black chaff".

Mr. Tom Kilduff, Research Extension Officer, Alberta Department of Agriculture, advises in Farm Notes that no alarm need be felt this year regarding black stem rust of wheat in Alberta. Conditions in Texas and the lower Mississippi basin for the overwintering of this disease were

very poor, he says. Consequently the build-up of stem rust spores this summer has not been great enough to reach here in any quantity. Damage from the small amount of leaf rust present is expected to be negligible.

Black Chaff has been found on wheat in this area. In one small field it has caused considerable loss of crop. In another field, with the same quantity of

Black Chaff present, the loss was much less. This could be due to the different stages of maturity of the wheat at the time the Black Chaff developed. The late crop is damaged most. The seed which produced the badly affected crop came from a field which is reported to have had Black Chaff on the wheat last year. It is evident that the bacteria is carried on the seed.

At Home and Overseas  
**SERVE CANADA**

in the **"Front Lines of Freedom..."**

with the **INFANTRY**  
(QUEEN OF BATTLES)

Modern inventions have not taken away from the Infantry its all-important part in victory. Again and again, in the battles of 1939-45 and in Korea, Infantry has proved itself — "Queen of Battles". The job of the infantryman has become tougher, more complex. He must be able to handle more weapons and to meet a greater variety of situations in defence and attack.

**MORE MEN ARE NEEDED IMMEDIATELY!**

**Enrolment Standards:**

To enlist you must:

- Volunteer to serve anywhere.
- Be 17 to 40 (Tradesmen to 45).
- Meet Army requirements.
- Married men will be accepted.

**Apply to the nearest Recruiting Depot:**

No. 10 Personnel Depot, Currie Barracks, Calgary, Alta.  
Army Recruiting Centre,  
Headquarters, Western Command, Kingsway Avenue, Edmonton, Alta.  
Edmonton Manning Depot, Prince of Wales Armouries, Edmonton, Alta.

OLIVER & MINNEAPOLIS MOLINE IMPLEMENTS — G. M. PRODUCTS

How many cheese dishes do you know? Too many Canadians think of cheese only in terms of a cheese sandwich, macaroni and cheese or apple pie with cheese. The average consumer in Canada uses barely more than four pounds per year as compared to eight pounds in the United States and 16 to 20 lbs. in European countries. Yet Canada is one of the major cheese producing countries in the world. Canadian cheddar is one of the best; few foods can be used in such a variety of ways, and few are as nutritious and economical.

Canadians should use more cheese, says Miss Joyce Lewis,

Nutrition Specialist, Alberta Department of Agriculture. Now is your opportunity to discover what a boon this food can be to your meal planning. This is the month of our Canadian Cheese Festival, and newspapers and magazines will be featuring cheese recipes in their food sections. Watch for new recipes for supper or luncheon dishes, soups, salads, biscuits, muffins, and desserts containing cheese.

Search out the cheese recipes in your cookbooks, advises Miss Lewis. You may be surprised to discover how many there are. One popular cookbook contains recipes for 53 different main dishes alone in which cheese is

one of the major ingredients. This does not include "au gratin" dishes in which cheese is used as a topping, nor does it include the many dishes which may be served with a cheese sauce. In addition we may have a variety of breadstuffs, attractive and tasty salads and appetizing desserts to which cheese adds "a different touch" and additional food value.

The Consumer Section, Marketing Service of the Department of Agriculture at Ottawa has published a little booklet of cheese recipes. Your District Home Economist will be able to provide you with a copy of this booklet or you may obtain it by

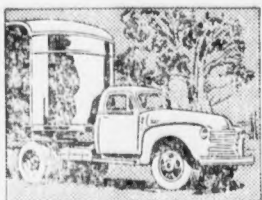

writing to the Home Economics Division, Alberta Department of Agriculture, Edmonton.

The 1951 edition of the Canada Year is now available and may be purchased from the King's Printer, Ottawa at \$3.00 a copy. Remittance should be made by money order, postal note or accepted cheque payable to the Receiver General of Canada. By special concession of the Minister of Trade and Commerce, a limited number of paper-bound copies has been set aside for ministers of religion, bona fide students and school teachers who may obtain copies at the nominal price of \$1.50

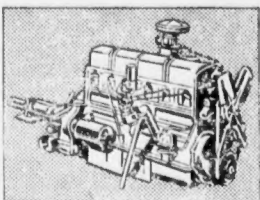

each. Applications with remittances for paper-bound copies must be forwarded to the Dominion Statistician, Dominion Bureau of Statistics, Ottawa.

This 1300 page volume features social articles on "Migratory Bird Protection in Canada," "Early Naturalization Procedure and Events Leading up to the Citizenship Act," "The Major Soil Zones and Regions of Canada," "Canada's Forest Economy," "The Indians of Canada," etc.

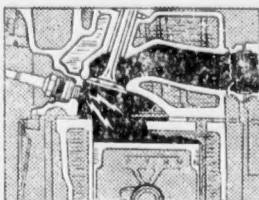

**USE THE CLASSIFIEDS FOR QUICK RESULTS**

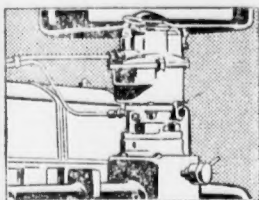

**POWERED FOR THE JOB**  
Four great engines! The 92-h.p. Thriftmaster, the big 103-h.p. Loadmaster, the massive 114-h.p. Torquemaster and the mighty 120-h.p. engine all deliver outstanding performance with remarkably low fuel and maintenance expense.

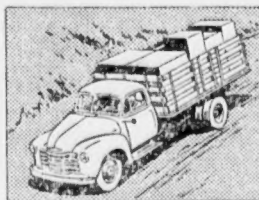

**VALVE-IN-HEAD DESIGN**  
For 39 years, Chevrolet has built valve-in-head engines. No other manufacturer has built so many, just as no other truck engine design can match the over-all economy and proved efficiency of Chevrolet's valve-in-head.

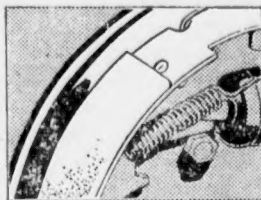

**BLUE-FLAME COMBUSTION**  
Wrings all the usable energy from every drop of gasoline. Blue-Flame combustion is possible only with valve-in-head engine design — provides greater power and livelier performance, through more efficient utilization of fuel.

**POWER-JET CARBURETOR**  
At low speed, on grades or at regular highway speeds, Chevrolet's Power-Jet carburetor maintains the proper fuel mixture for the engine. This, plus fast warm-up, smooth, quick response, means surprisingly low operating costs.

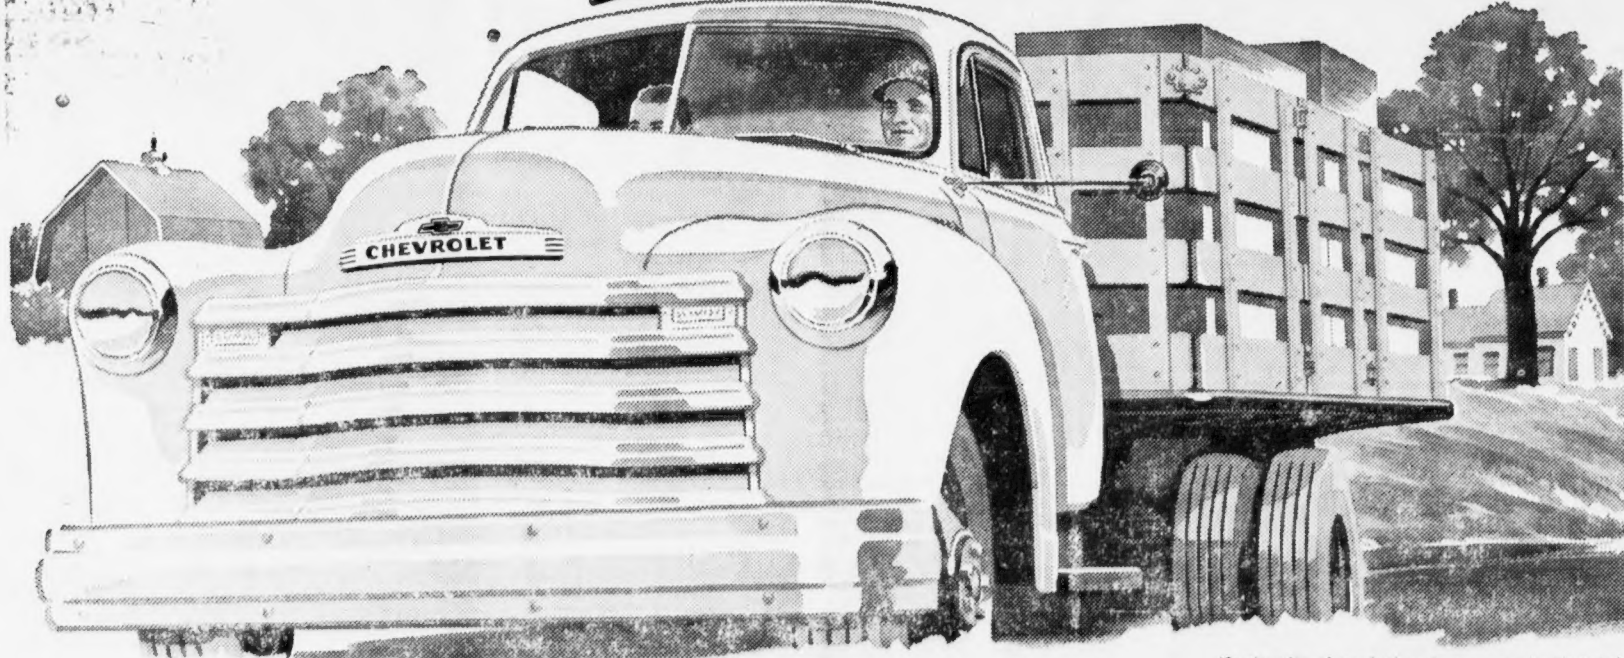

**LONG LASTING BRAKES**  
The greater self-energization of Chevrolet hydraulic brakes provides smoother, safer braking — completely equalized pressure to each brake. This in turn assures full lining contact and longer wear — for the brakes on your truck.

**BONDED BRAKE LININGS**  
No rivets! On light- and medium-duty models, the lining is bonded directly to brake shoes to increase life and to eliminate danger of scoring brake drums as lining wears. You get extra wear — safer brakes.

**greater economy**  
*engineered in!*  
**... to do more work for your money**

(Continuation of standard equipment and trim illustrated is dependent on availability of material.)

Just take a look at the engineered-in economy features of Chevrolet trucks. Features like valve-in-head engine design, Blue-Flame combustion, Power-Jet carburetor, long lasting brakes and a host of others. All the vast engineering and manufacturing experience of Canada's largest truck builder is used to give you greater economy on the job.

And Chevrolet economy goes far beyond low operating costs. It means engines, chassis

and cabs will stand up under rough, tough use month after month, year after year. It means building extra ruggedness and extra efficiency into Chevrolet trucks at lowest cost.

Every day, more and more truck users are switching to new Chevrolet trucks. Take a tip from these truck-wise buyers and get engineered-in economy and more work for your money.

## Athletes Go Stale Too

Variety is often called the spice of life. It keeps people from being bored. But an athlete needs variety too, in his training, and when he doesn't get it he becomes stale.

The symptoms can be any of the following: extreme irritability; lack of interest; inability to put much drive into play; a heavy-legged feeling; loss of pep and energy; loss of weight; loss of skill; sensitivity to what people say or think; a pale, wan look.

Yes, staleness is actually a state of boredom. Its cause is chiefly mental. Its reactions affect the athlete physically.

Lack of variety and interest in the work being done is the chief cause of staleness, along with sustained work and too few rest periods between practice sessions. Because an athlete is working exceptionally hard in practice does not necessarily mean he is in danger of going stale. But the one who is forced to do the same sort of thing over and over again, (such as when the type of practice is never changed) is a real prospect.

Emile Zatopek, the great Czechoslovakian distance runner and Olympic 10,000 metre champion, is one athlete who does a tremendous amount of work in practice without going stale. He sometimes runs as many as 60 repeated quarter miles in one afternoon's training session, all of them 65 seconds or faster. In 1949 he rested only 11 days in the whole year. But by keeping his training full of variety and interest, he was able to keep from going stale.

A good coach or trainer is always seeking signs of staleness in his athletes. Coaches prepping for big games or events such as the Stanley Cup Final, the Olympics or the Rose Bowl, have real nightmares about seeing their stars go stale just before the game.

Staleness was probably responsible for the old saying "All work and no play makes Jack a dull boy." That works the other way round too; all play and no work! The person without enough balance or interest in his life, who works all the time and seldom takes any change from applied effort for periods of relaxation or recreation, is another potential staleness victim. The idea is to hit a proper balance between work, rest and play. The individual gets mentally sick or bored with doing the same old thing. Then his mind causes his body to act up in order to force a change.

### What To Do

The prevention of staleness, of course, is proper balance in training as in everyday life. Attention to proper diet, and plenty of rest are also important details.

The cure for staleness, once it happens,

By JANE DALE

### COMPENSATION

I have said goodbye to each child in turn  
As they set out on life's long road;  
I have given my blessing to speed them on  
And my prayers to lighten their load.  
I often yearn as time swiftly flies  
For the days when the children were small  
When they played about, then safely abed  
My eyes could rest fondly on all.  
Now they have gone along paths of their own,  
Along new trails I never did know  
I find my own life expanding, more full  
As with each one in spirit I go.  
I rejoice in new goals so hardly won,  
And care when a venture is lost;  
I know that success doesn't come overnight,  
And I know what all gain does cost.  
Though I say goodbye to each child in turn  
And sometimes wish they were small  
They have brought to me much beauty and grace  
That I ask God's blessing on all.

### Weekly Tip

#### EASIER CLEANING

Three coats of waterproof varnish applied to the wall behind the kitchen stove makes easier cleaning of this surface with soap and water.

The average hen's egg weighs two ounces. 2958

## World Happenings Briefly Told

A \$7,500 medical centre has been opened at the Royal Albert docks, London. Two nurses will be on hand during working hours to provide on-the-spot medical attention.

James Quinney shot down a rare albino crow in Great Central Lake on Vancouver Island. Experts figure that there is only one albino to every 50,000 regular black crows.

Julius J. Buckley, indicted on lottery charges in Worcester, Mass., was picked to serve on the jury panel scheduled to hear his own case. Court officials said he would be excused.

A volume believed the oldest Ukrainian book in Canada was recently donated to the University of Manitoba. Entitled "Pomyanyk" and written in 1484, it contains obituaries of prominent European Slavs.

A Berliner who doubted lions are dangerous stepped into a cage at a circus and stroked one of the beasts. The lion resolved his doubts. It snapped back and mauled the visitor's right arm.

Free admission to the zoo in Auckland, N.Z., is gained by presenting two live frogs needed for a white heron recovering after being mauled by dogs. The heron is willing to eat fish but has indicated that an invalid is entitled to variety to titillate the palate.

In St. Boniface, Man., Princess Elizabeth was presented with a golden rose on whose petals the Oblate Sisters of St. Boniface had worked the images of eight members of the royal family including the Princess and the Duke, and the Duke's mother.

It is estimated the Leaning Tower of Pisa in Italy will lean three inches more in the next 100 years.

### PRISCILLA'S POP—And Guess Who Won

### SECOND OLDEST B.C. CITY

## Nanaimo Owes Its Existence To Coal Found In 1849

(By William French, in Toronto Globe and Mail)

Nanaimo is the second oldest city in British Columbia and the second largest city on Vancouver Island, giving way in both instances to Victoria. It owes its existence to the invention of the steam engine, for it was founded because of the coal deposits near-by.

Coal from its mines fed the boilers of steamships after they made their appearance on the Pacific Coast. It was shipped down to the Royal Navy base at Esquimalt for the ships of war, and it was piled on the Nanaimo docks for ships which wanted to refuel on their way to the Fraser River gold strike. Later, it was used by steam locomotives when the railway arrived.

Coal is not as important to Nanaimo as it used to be. The big seams of coal have been exhausted and there is not much mining there now. The city is growing because of other industries—lumbering, fishing, manufacturing and agriculture.

Nanaimo occupies a commanding site above a bay, screened from the Strait of Georgia by Gabriola Island. On the east side of Vancouver Island, it is 40 miles west of Vancouver, across the strait, and 72 miles north of Victoria. About 15,000 people live there.

The Canadian Pacific Railway operates a ferry service between Vancouver and Nanaimo and two trips a day are made. The city is connected to Victoria by the Esquimalt and Nanaimo Railway and a highway.

After the Hudson's Bay Co. founded the post which later became Victoria, company officers heard from

the Indians about coal deposits up the coast. The coal was found in 1849 and a fort was built there by the company, part of which is still standing.

Miners were brought from Scotland to dig the coal, but most of them eventually forsook the workings in hope of finding easier wealth in the goldfields of California and the B.C. mainland. New miners replaced them.

Until 1859, the site of the fort and mines was known as Colville, after Andrew Colville, governor of the Hudson's Bay Co. In that year the name was changed to Nanaimo, an Indian term meaning home of the five bands, forming a loose confederacy.

As the demand for coal grew, so did the town. It was incorporated in 1874.

There are 29 factories in the city now, including lumber mills, a new pulp mill, and herring fisheries. The area around the city is good dairy and mixed farming land. Trout fishing and deer hunting attract tourists. During the Second World War, Nanaimo was the site of an important army training camp and depot.

At Departure Bay two miles north of Nanaimo, is the federal government's Pacific Biological Station, where scientists conduct important research which aids particularly the fishing industry. They study the life of the salmon, trout, cod, crabs, clams and oysters, the occurrence and distribution of plants and animals along the coast, and the character and movement of ocean water.

Radio signals travel in space at 186,000 miles an hour.

### —By Al Vermeer

# Mackenzie Highway Vital Link To Canada's West Northland

Important Supply Route for Northern  
Industry and Outlet for Minerals

EDMONTON. — The Mackenzie highway, a vital link with Canada's northland, reached farther into the Northwest Territories than any other highway in Canada. Only the Alaska highway extends farther north, but it enters the Yukon without touching the Northwest Territories, and doesn't link with important industries of the area.

The all-weather Mackenzie highway stretches across muskeg, forests and farmlands for 384 miles from Grimshaw near Peace River in Alberta to Hay River on Great Slave Lake in the Northwest Territories.

It is a vital, supply route for northern industry, carrying mining machinery, provisions and supplies to the north and shipments of fish, grain, fur and lumber to the rail port of Grimshaw. It is also an important outlet for gold from Yellowknife and uranium from Port Radium on Great Bear Lake.

Large trucks now deliver supplies to the doorsteps of traders who once waited weeks for them to be freighted along the Peace River or carried by winter tractor-train. The truck cargoes are moved on to Yellowknife and points on the Mackenzie river by boat from Hay River.

Homesteaders in Alberta's far north use the highway to carry harvests to elevators. Areas around Manning, Keg River and Fort Vermilion have become increasingly important as agricultural centres and last year alone marketed more than 600,000 bushels of wheat and 200,000 bushels of coarse grain.

Great Slave Lake is Canada's greatest supplier of fresh-water fish. Last year about 8,000,000 pounds of whitefish and lake trout, valued at \$612,000, were hauled from Hay River down the Mackenzie highway while only about 1,000,000 pounds were carried by the water route.

Formerly limited supplies of fish were taken only in summer from the northern lake and transported by water down the Slave and Athabaska rivers to waterways on the Athabaska river. Winter fishing now accounts for almost half the total annual catch.

The fur industry has also been af-

ected by the highway. Pelts are shipped in large trucks to Grimshaw. Trappers and traders have been brought closer to Peace River towns and are within easy reach of hospital and medical services.

Tourists seeking new horizons travelled the highway last summer, stopping to view two of the north's scenic spots—the Louise and Alexandra Falls. Both are located on the Hay River, within the Northwest Territories.

Construction of the highway was started in October of 1946 and completed in 1948. Preliminary surveys had begun in 1938 and were carried on during the winters of 1938-39-40 in an effort to find a winter road for tractor-trains.

The winter road was used during the winter months until the all-weather highway was built. Parties set out in 1945 to survey the terrain for the Mackenzie highway. They followed the same general route of the winter road, detouring around muskeg and swamp areas.

Construction of the \$4,300,000 highway was a joint effort of the federal and Alberta governments. The 303 miles in Alberta were paid for jointly while the 81 miles in the Northwest Territories was a Dominion government project.

Maintenance graders and trucks keep the road in condition during summer months and two snow plows keep it open during the winter.

## Sentimental Husband Finds Buried Treasure

SAN FRANCISCO. — Richard Adams struck buried treasure—because he was sentimental about his wedding.

After he was married he found some rice lodged in the pockets of his wedding suit.

The Adamses planted it in a small container and before long had a rice paddy too large for a window pot.

So Adams took it to his place of business and began to dig a seed bed in front of the building. His shovel clanked against metal.

Adams ended up with enough rolls of nickels, dimes and quarters to fill a coffee can.

The treasure will be cleaned and polished as an anniversary gift for his wife, Lorene.

REMAINS OF AIRCRAFT—An unidentified man looks over the remains of a twin engine Canso aircraft that crashed with terrific force against the rocky face of Mount Benson, near Nanaimo, B.C., Oct. 17. All 23 persons aboard were killed. The plane was en route from Kamano to Vancouver when the mishap occurred.

## Edmonton Lady At 93 Feels Like 28

EDMONTON. — Mrs. M. A. Newell, of Edmonton, who recently celebrated her 90th birthday, said she feels more like 28.

Born in Ottawa in 1861, Mrs. Newell came to Alberta in 1913 to settle in the Edson district.

From childhood days on the farm she recalled the time when her father was called out to help against the Fenians on one of their raids from across the United States border.

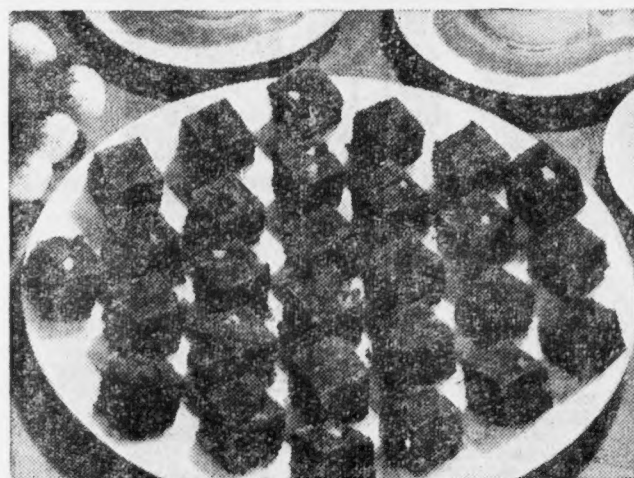

Mrs. Newell, still active and keen of mind, spends much time reading, knitting and sewing. Bothered by arthritis, she cannot get around as much as she would like.

Mrs. Newell is the oldest in a family of nine and has a brother 85, in Philadelphia.

## SHOOTS ALBINO DUCK

WILCOX, Sask. — An albino duck was shot near here by Billy Schneider. The duck, a spoonbill, had flesh-colored feet and bill, pale pink eyes and white feathers.

## Chocolate Cream Cheese Fudge

Every once in a while there comes along a new use for a familiar product—and you say to yourself, Now, why didn't I think of THAT?

Here is one such brand new idea you'll want to adopt for your very own the minute you try it. It's fudge—smooth, creamy, rich chocolate fudge, made in a matter of a few moments with—here is the surprise—cream cheese as its basis. No cooking, no fuss, no bother—simply a matter of blending this most delicate of all cheese varieties with the correct amounts of confectioners' sugar, melted chocolate, vanilla, and chopped nuts—chilling the mixture to firmness. And there you are!

Until you've tasted this new quick, uncooked fudge, you can't appreciate properly how truly luscious it is. And what a boon to busy candy-lovers—a way of making fudge that's perfect every time—and so quick to do.

One of the important virtues of

## CHOCOLATE CREAM CHEESE FUDGE

1 4-oz. pkg. cream cheese  
2½ cups sifted confectioners' sugar  
2 1-oz. squares unsweetened chocolate, melted

Place the cheese in a bowl and cream it until soft and smooth. Slowly blend the sugar into it. Add the melted chocolate. Mix well. Add the vanilla, salt and chopped pecans

and mix until well blended. Press into a well greased, shallow pan. Place in the refrigerator until firm and cut into squares.

For a slightly softer fudge blend in 1 teaspoon of cream.

## GEMS OF THOUGHT

### INDUSTRY

Application is the price to be paid for mental acquisition. To have the harvest we must sow the seed.

—Bailey.

A man who gives his children habits of industry provides for them better than by giving them a fortune.—Whately.

The richest blessings are obtained by labor.—Mary Baker Eddy.

Every man shall receive his own reward according to his own labour.

—I Corinthians.

Fortune may find a pot, but your own industry must make it boil.

—Gay.

The darkest hour in one man's life is when he sits down to plan to get money without earning it.—Greeley.

Statistics show that people who receive expert driver education are involved in 40 to 60 per cent. fewer accidents than others.

## National League

# Hockey Notes

## Same Captains As Last Season

The six National Hockey League teams will start the 1951-52 season with the same captains they had a year ago. Most seasons find at least one new skipper, but this year the teams are carrying on with the same leaders they had in '50-51. Milt Schmidt captains Boston Bruins, Jack Stewart the Chicago Black Hawks, Sid Abel the Detroit Red Wings, Butch Bouchard the Montreal Canadiens, Frank Eddolls the New York Rangers and Ted Kennedy the Toronto Maple Leafs.

## Silver Anniversary for Two Hockey Executives

Two of the National Hockey League's best known executives celebrate their 25th year with their respective clubs this season. They are Conn Smythe, president and manager, director of Toronto Maple Leafs, and Jack Adams, manager of the Detroit Red Wings. Smythe and Adams started with Toronto and Detroit respectively in 1927-28 and have been with them ever since.

## 324 Goals for Nels Stewart

After carefully checking the N.H.L. statistics during the 15 seasons he played in the League, it's been found that Nels "Ole Poison" Stewart actually scored 324 goals and not 323 as he's been credited with these many years. The extra goal was tallied in the 1933-34 season when he was playing for the Boston Bruins. Stewart scored 22 goals that season and not 21 as was recorded in the record books. This brought his total up to 324.

## Three Familiar Faces Missing From Rangers

There are three faces missing from the lineup of the New York Rangers this season that New York fans will miss. They are Center Buddy O'Connor and Defensemen Pat Egan and Wally Stanowski. The trio of veterans have been sent to Cincinnati Mohawks of the A.H.L. O'Connor, 35; Egan, 33; and Stanowski, 32; were all brilliant performers in the National League before old father time caught up with them.

## Italians on Chicago Black Hawks

Chicago Black Hawks have more players of Italian extraction on their lineup than any other team in pro hockey. The Hawks have no less than three members of the squad whose parents originally came from sunny Italy. They are Lee Fogolin, bashing defenseman, and Bep Guidolin and Pete Babando, aggressive forwards. Fogolin, Guidolin and Babando all played for Detroit Red Wings at one time during their N.H.L. careers.

## Ex-Rangers on Boston

Boston Bruins have a strong New York flavor to their club this season. There are five former wearers of the Blueshirt on the Bruins roster this semester. The five ex-Rangers are Goalie Jim Henry; Defensemen Hal Laycoe and Gus Kyle; and Forwards Dunc Fisher and Pentti Lund. All five have joined the team since Lynn Patrick, former coach of the Rangers, took over the coaching reins of the Beantown Boys.

## Youthful Club at Detroit

Only four members of the 1951-52 edition of the Detroit Red Wings are over 27 years of age. They are Sid Abel, 33; Bob Goldham, 29; Leo Reise, 29; and Tony Leswick, 28.

## THE ASSOCIATION OF TALL WOMEN

LONDON. — The British "Association of Women with Large Feet" reports it is becoming a power in the land under a new name: "The Association of Tall Women".

Long-stemmed ladies throughout the United Kingdom are joining up at the rate of 50 a week.

Dress manufacturers have hastened to heed the association's dictum that big girls can't wear frocks styled for the "average dumpy doll."

## SMILE OF THE WEEK

Some men defy old age—they still believe they're as good as they never were.

## ANSWERS TO QUICK QUIZ

ANSWERS: 5. Hudson Bay. 3. Superior, Michigan, Huron, St. Clair, Erie, Ontario. 1. Montreal and Toronto. 4. Nickel, newsprint, radium, platinum and asbestos. 2. 100 per cent.

(Material supplied by the Editors of Quick Canadian Facts, the handbook of facts about Canada.)

Gas first was used for street lighting in 1807 in London.

## Helpful Hints

A good basic plan for stiffening shirts to perfection is to use light starch for the body and sleeves; double or triple strength for collars, cuffs, button and button-hole bands.

A cigarette burn on the carpet need not always be the tragedy it appears at first glance. If it's a superficial burn, snip the blackened ends off the wool tufts, then follow this with a sponging with soapy cleaner and water. If the area is badly burned, call in a professional to take care of the damage by wool replacement.

When sewing on buttons that are subject to hard wear, slip a pin across the face of the button and sew over the pin through the eye-holes of the button. Finally, wind thread several times between button and material and fasten the thread securely.

A little ground cinnamon sprinkled directly on the gas flame will do wonders about those cooking odors.

Think Right—Eat Right—Live Right

## OUR COMPLETE SHORT STORY—

## The Boy With Fifty Bottles

Romance Starts in an  
Uncanny Way.

By KERRY WOOD

JIMMY placed ten bottles of Rose de Parée perfume in his pockets. The first time he'd gone out selling the stuff he'd carried fifty bottles, but he'd sold only five. At 15 cents a bottle, he was a long way from earning the \$7.50 he had to send the perfume company to qualify for the fishing outfit they offered as premium.

He walked over to Poplar Street and knocked on a door.

"She's no home," said Nick the Vegetable Man, coming up behind. "Missus Rovers, she's up da town. She's see me and she's buy dis cabbage, which I leave now."

"Okay, Nick," Jimmy nodded, pausing to pet Tony and Toby, the two billy goats who pulled Nick's cart. "Whew! Your goats sure smell strong, Nick."

"Da smell, she's healthy," defended Nick, breaking into operatic song.

Jimmy went over to Mrs. Dandell's. She told him that her husband had just bought her a large bottle of her favorite perfume as a birthday present. But she gave him a cookie. Next house, the lady said no and closed the door. The fourth house produced another cookie, but no sale. Jimmy sat at the curb to eat his cookies.

"Hi!" It was Buck Peters, the policeman. "Why so solemn?"

"It's on account of a fishin' outfit, Mister Peters. It's got a four-foot steel rod, a reel that clicks, a line that's fifty feet long, a red an' white float, an' five hooks."

"Sounds dandy," said the town's police force. "Where is it?"

"Oh, I haven't got it yet," Jimmy pulled out a bottle of Rose de Parée. "I gotta sell this perfume, first."

"So-o-o-o!" Y'know, I once earned a baseball glove by selling a hundred bottles of perfume."

"It's hard work."

"Not too hard, son. Just keep at it."

"Yes, sir," Jimmy nodded. He stared up at Buck Peters with candid eyes. "Look, Mister Peters—I bet you'd make a hit with Miss Morgan, the teacher, if you'd give her some o' this perfume as a present, maybe."

Buck Peters stared. "What makes you think I want to make a hit with her?"

"Well, last Sunday I was out at Crystal Lake when you were sittin' on the hill by the Old Snag. After you left, I went up to the Snag an' seen where you'd written her name in the sand extra fancy."

Buck Peters hunched down. "Listen, son! As a favor, keep it quiet."

"Sure, Mister Peters. Doesn't Miss Morgan know?"

"No one but you and me. Let's keep it a secret."

"Yes, sir. I c'n keep a secret good."

"I'll bet you can." The policeman clapped the boy on the back. "How many bottles of perfume have you got?"

"Ten, here in my pockets."

"Ten, eh? And the price . . . Fifteen cents? Here's a dollar and a half. I'll buy every bottle. But remember, that other matter is a secret."

"Sure thing! And thanks a lot."

The boy whistled as he walked down the street, mentally checking his totals. Ten bottles sold, plus the five other bottles; that left only thirty-five to sell.

"I better see if Mr. Dennis has any parcels to deliver," he decided, stepping into the drug store. Then he stood stricken, seeing Miss Morgan. She was looking at perfume bottles. Jimmy made a quick decision.

"Miss Morgan, can I talk to you, please? It's just that you're going to get some perfume, free as a present."

"I haven't any friend who'd buy me perfume."

"Sure you have. He's a swell guy, too. Only, I promised not to tell."

"But how do you happen to know all this?"

"Well, I'm tryin' to earn a fishin' outfit, and I got to sell fifty bottles of Rose de Parée perfume. This man who likes you took ten bottles from me, at fifteen cents each, but it's a

secret. I found out about him liking you, and he wants it kept quiet because you don't even know yet."

"Ohhh?" Miss Morgan looked confused. "I use a lot of perfume so perhaps I could buy some of yours, too. How about selling me five bottles?"

"Say, that's swell! I haven't got any with me, but I'll run home an' get 'em right away."

They went down Central Avenue together. At the corner, Nick the Vegetable Man was standing near his cart while Buck Peters was bending over Tony and Toby, the two billy goats.

"My goats, she smells good now, huh, Jimmie?" smiled Nick. "Lookut what Mista Peters do: he empty ten bottles o' parfoom all over da goats."

"Ten bottles—?" Miss Morgan stared at Buck Peters in a speculative way, while Buck gazed back at her with obvious pleasure. Miss Morgan became pinkish, but she was smiling.

"It's all right, son," Buck dropped a hand on the boy's shoulder. "Nick's goats certainly needed that perfume, and I thought perhaps you'd sell me some more."

"Ohhh—Sure thing, Mister Peters!"

"How many bottles left, Jimmy?"

"Thirty-five, sir—No, I only got thirty, 'cause Miss Morgan here is going to buy five."

Buck Peters gazed at Miss Morgan again. This time, it was his turn to get embarrassed, seeing the amusement in her eyes. He turned back to Jimmy.

"That's fine perfume, son. Even Nick's goats smell wonderful. Y'know, I think I'd best buy all thirty bottles, this time."

"Gee willikers! I'll get 'em, right away!"

"I'll come with you," suggested the policeman. He fell into step.

"I'll run ahead an' get them," Jimmy said, excited.

"A good idea," nodded Buck. "Don't you think so, Miss Morgan?"

"An excellent idea," she agreed, smiling.

Behind them, Nick the Vegetable Man began to sing. This time, it was a love song.

Mrs. Fred Waring  
Compares Blue Bonnet  
— Likes It Best

Mrs. Fred Waring wants to share a discovery with you. Compare BLUE BONNET Margarine with any spread at any price. Like the wife of the famous band leader, you'll love the delicate, sunny-sweet flavor of this fine-quality all vegetable margarine. You'll appreciate BLUE BONNET's nutrition. And you'll welcome its real economy! So buy BLUE BONNET and get "all 3"—Flavor! Nutrition! Economy! Use it in cooking, on vegetables, as a delicious spread.

BLUE BONNET Margarine is sold in two types—regular economy package with color wafer, and also in the famous YELLOW QUIK bag for fast, easy color.

BT-31

WINSTON CHURCHILL

Once again Winston Churchill has been chosen as prime minister of Great Britain. It was Churchill who successfully lead the British people in the country's worst crisis during World War II, and the people are now looking for his guidance during their present difficult time.

## : Western Briefs :

## Shortage of Manpower

REGINA.—Shortage of manpower is bringing women into employment on jobs normally reserved for men, the unemployment insurance commission reported in its prairie regional bulletin. A wholesale tobacco and confectionery firm in Moose Jaw was unable to get male warehouse help and decided to try two girls on this work. They have proved very satisfactory, the bulletin added.

## Highway Closed

REVELSTOKE, B.C. — Big Bend Highway, 17 miles north of Revelstoke, to Donald, has been officially closed for the winter season.

## Set an Example

WINNIPEG.—A 102-year-old citizen set an example at the polls in the Winnipeg civic election and the tardy voter could take encouragement from it. John Hannah, who celebrates his 102nd birthday, was out bright and early to maintain a flawless 71-year record of marking ballots.

ODDITIES  
In The News

A hideous, leering head of a wolf topped the body of the witness testifying at Upper Marlboro, Md., before a grand jury investigating gambling. The witness was a woman who donned a wolf's head mask—complete with long snout, lolling red tongue and pointed ears—to avoid identification as she left the jury room.

A. J. Anderson of Minneapolis, has enrolled in a course entitled "Life begins at 65" at the Y.M.C.A. He is 82.

When Frederick Decker, 32, of Twickenham, England, found an injured squirrel he took it to hospital where a nurse found its leg was broken. Decker tried two wooden splints, which the squirrel ate. Now it has an aluminum splint.

Sammy, the pet goldfish at a school in this Staffordshire town, was left alone when fire broke out in part of the school. After the blaze was extinguished, Sammy was found happily swimming in his warm water bowl.

The Michael H. Cross family of Mason City, which planned to name their first boy Chris Cross, was visited by a double cross. Mr. and Mrs. Cross didn't get a boy on their first expectancy five years ago. It was a girl, who they named Christine Anne but everyone called her Chris. Then twins were born. Their names have not been selected.

## Para-Rescue Course Graduates

EDMONTON.—Four nursing sisters and 11 air force doctors and medical orderlies became the first all-medical group to graduate from an R.C.A.F. para-rescue course. In a ceremony at tactical air group headquarters here they received para-rescue badges from Air Marshall W. A. Curtis, chief of air staff.

## Fish Filleting Plant at The Pas

THE PAS, Man.—The Pas is going to have its own fish filleting plant. The plant will service fishermen in the surrounding areas and will be constructed some time this winter. It will be in operation only during the winter months.

## Did It the Elementary Way

VANCOUVER.—Robert McBay, 67, caught a 10-pound salmon with his bare hands at Kitsilano beach here. He waded into the water with his clothing on and scooped the fish up, taking 10 minutes to subdue the flipping salmon.

## Tourist Monies Up

REGINA.—American tourists spent nearly \$2,000,000 in Saskatchewan this year. Last season they spent \$1,800,000. The government bureau of publications also said total tourist revenue from all sources will be up about \$250,000 to about \$4,000,000.

Water in the oceans of the world is estimated to total some 324 million cubic miles.

Five Westerners  
Win Awards  
For Heroism

Royal Canadian Humane  
Association Recognize Acts  
Of Nine Canadians

HAMILTON, Ont. — Acts of heroism by nine Canadians were recognized by the Royal Canadian Humane Association in awards made. All were awarded the association's parchment certificates.

Allan Walker Kitteringham, Vancouver, was honored for the rescue of Carol, Edna and Gordon Dalziel from their burning home on Jan. 20.

The following awards were made for bravery in aquatic accidents:

Norman Yerkins, 11, of 24 3rd Avenue, Dauphin, Man., for the attempted rescue of Geraldine Geddes from drowning in the Vermilion River, Dauphin, June 30, 1951.

William Irwin Munro, Winnipeg, for the rescue of a woman from drowning in the Red River at Winnipeg, June 2, 1951.

Theodore Lennox, 503 McConnell Road, Chilliwack, B.C., for the rescue of Ernest Semko from drowning in Cultus Lake, B.C., June 17, 1951.

F. G. Copeland of the light station at Carmanah Point, B.C., for the rescue of the crew of the Seine boat, Delmar, two miles west of Carmanah Point, Nov. 2, 1950.

## LITTLE NEWS ITEMS OF LOCAL INTEREST

The little Helpers of the Anglican Church attended a service on Tuesday afternoon at which the money saved by the children in their "mite boxes" throughout the year was collected and dedicated to missionary work among children in India and China. After the service lunch was served in the basement to children and parents.

Mrs. Winifred Sherring, who is now resides in Calgary, was presented with a silver spoon by Mrs. Harry Hunt, president of the W.A. She also received a farewell gift of a cup and saucer from The Little Helpers in appreciation of her work as secretary during the past few years.

For next week only the Tuesday night show, "No Man of Her Own", will be shown on Monday, November 12.

Monday, November 11 has been declared a Dominion holiday and all places of business will be closed.

The Carbon Lions Club Halloween party for kiddies was again a big success and each child received a big bag of treats. A list of costume prize winners will be published in our next issue.

The choir of Carbon Baptist Church on Sunday, November 11, at 7:30 p.m., will present a Vesper Service of special request numbers, instrumental music, sextette and the Sinner and the Song. The public is heartily invited to this rare service.

All Legion members and war veterans are asked to turn out for the Remembrance Day Service at Carbon United Church on Sunday, November 11, at 12 noon. Veterans will form up at the Legion Hall between 11 and 11:30 and parade to the church. War service medals will be worn.

Following the service veterans will parade to the Cenotaph in the park for the wreath laying ceremony.

In conjunction with the Carbon Fish and Game Association, the Lions Club is again planning a Turkey and Ham Shoot in Carbon. The event will be held Wednesday, November 28, and will include a .22 rifle range for those who are not so adept with a shot gun but still want to try for their Christmas turkey. The shoot will start at 11 a.m. and refreshments will be served at a nominal cost.

FOR SALE — Yorkshire Weaner Pigs. Apply to Bill Varga, two miles east of Carbon. 41-3tc

## HI-SCHOOL HI-LITES

An inter-school council for co-ordination of school activities in district towns was formed Tuesday at a meeting at Acme. Representatives were present from Carbon, Swalwell, Three Hills, Acme and Beiseker and elected the following officers; president, Marjorie Park, Acme; vice-president, Jim Foster, Carbon, secretary-treasurer, Louise Schmaltz, Beiseker.

The council decided to hold a combined bonspiel in one center each year with the first being held at Three Hills. The next meeting is scheduled for Swalwell on December 11.

Due to the present state of affairs in Hi School, the Grade X students have been threatening to quit, but there has been a rumor making the rounds that a tall, dark and handsome farm lad will soon be in attendance. They have decided to stay.

Our beloved C.S.U. president has left school to start her career in Nash's store. Mary's departure has brought tears to eyes of the boys of Carbon Hi.

Tom Sugden has become quite popular with his mandolin. Some of the Hi School boys attended a concert (of sorts) in his 'shack' the other night.
